**English for Health, Exam Code 03**

6. Convened means
   A. Funded
   B. Convoked
   C. Decided
   D. Researched

**Part II. Read the sentence and put your answer on the answer sheet.**

7. When someone tells you to **wary**, you should be_____
   A. Emotional
   B. Careful
   C. Happy
   D. Sad
8. If something is **heinous**, it is _____
   A. Awful
   B. Pretty
   C. Bright
   D. Attractive
9. Pick the closest definition to **erroneous.**
   A. Extravagant
   B. Right
   C. Wrong
   D. Enormous
10. After taking the final exam, she felt as though an **enormous** burden had been lifted.
    A. Bitty
    B. Teeny
    C. Bantam
    D. massive
11. I can _____ the future of your relationship.
    A. Foretell
    B. Assume
    C. Conspire
    D. Identity

**Part III. Choose the correct answer and put on the answer sheet.**

12. Will you come to dinner with us if you _____a baby sister for you?
    A. Had found
    B. Will find
    C. Find
13. I _____want to be practicing doctor but now I'm more interested in research.
    A. Was used to
    B. Used to
    C. Would
14. I _____ go to see doctors last week because I was very ill.
    A. Must
    B. Have to
    C. Had to
15. If I _____very hard, I would have been able to pass the exam.
    A. Had tried
    B. Try
    C. Would have tried

During the meeting, the more than 300 scientists and researchers participating both in person and virtually agreed on a set of global research priorities. They also outlined mechanisms for continuing scientific interactions and collaborations beyond the meeting which will be coordinated and facilitated by WHO. They worked with research funders to determine how necessary resources can be mobilized so that critical research can start immediately.

The deliberations will form the basis of a research and innovation roadmap charting all the research needed and this will be used by researchers and funders to accelerate the research response.

**Part I. Read the passage very carefully and put your answer on the answer sheet.**

1. Which Two ideas Dr Tedros Adhanom highly interested with
   1. The outbreak of COVID-19
   2. The research community and their collaboration
   3. The 2 day forum
   4. The team developing drug and distribution before epidemic.

   A. 1 & 2 C. 2 & 4
   B. 1 & 3 D. 2 & 3
2. The member of the meeting discussed on the following except
   A. Account of the past events and its castigation
   B. Ethical consideration for research
   C. Characterization and controlling techniques
   D. Number of people infected with the disease
3. The word Solidarity … means
   A. Sympathy
   B. Union
   C. Firm
   D. Substance
4. The word "this" paragraph 3 line 1 refers to
   A. Meeting
   B. COVID 19
   C. Drug and vaccines
   D. Research
5. "Equitable access.." paragraph 5 line 4 implies that
   A. Giving priority for middle income countries
   B. Highly giving ethical consideration than other
   C. Fair distribution of data for all
   D. None

**Instruction: Do the following questions according to the instructions for each part.**

Leading health experts from around the world have been meeting at the World Health Organization's Geneva headquarters to assess the current level of knowledge about the new COVID-19 disease, identify gaps and work together to accelerate and fund priority research needed to help stop this outbreak and prepare for any future outbreaks.

The 2-day forum was **convened** in line with the WHO R&D Blueprint – a strategy for developing drugs and vaccines before epidemics, and accelerating research and development while they are occurring.

"**This** outbreak is a test of **solidarity** -- political, financial and scientific. We need to come together to fight a common enemy that does not respect borders, ensure that we have the resources necessary to bring this outbreak to an end and bring our best science to the forefront to find shared answers to shared problems. Research is an integral part of the outbreak response," said WHO Director-General Dr Tedros Adhanom Ghebreyesus. "I appreciate the positive response of the research community to join us at short notice and come up with concrete plans and commitment to work together."

The meeting, hosted in collaboration with GloPID-R (the Global Research Collaboration for Infectious Disease Preparedness) brought together major research funders and over 300 scientists and researchers from a large variety of disciplines. They discussed all aspects of the outbreak and ways to control it including:

- the natural history of the virus, its transmission and diagnosis;
- animal and environmental research on the origin of the virus, including management measures at the human-animal interface;
- epidemiological studies;
- clinical characterization and management of disease caused by the virus;
- infection prevention and control, including best ways to protect health care workers;
- research and development for candidate therapeutics and vaccines;
- ethical considerations for research;
- and integration of social sciences into the outbreak response.

"This meeting allowed us to identify the urgent priorities for research. As a group of funders we will continue to mobilize, coordinate and align our funding to enable the research needed to tackle this crisis and stop the outbreak, in partnership with WHO," said Professor Yazdan Yazdanpanah, chair of GloPID-R. "Equitable access – making sure we share data and reach those most in need, in particular those in lower and middle-income countries, is fundamental to this work which must be guided by ethical considerations at all times."
